**Subject:** ER funding for Colorado Local AGENICES

Due to the state's federal designation related to recent weather events, local agencies may be eligible to receive ER money for repair to highway infrastructure. Also, it's possible that Local Agencies could receive FEMA \$ for debris clean-up.

In any case, please pass the word on to the local agencies in your region. Also, it is strongly encouraged that agencies track or at least document the cost, nature and/or location of the work as specifically as they can, if they are considering requesting federal reimbursement. In the interim, they are encouraged to log items as simple as, for example, "culvert on County Road 10 approximately 5 miles north of I-70 was washed out on Sept. 12." Alternately, they can keep records of repair costs on with existing tracking systems.

Compensation may be available for time, materials and services.

Thanks for passing it on.
