Subject: RE: Flooding response

Date: Mon, 16 Sep 2013 14:39:37 -0600

We are small engineering firm that provides high level of consulting with municipalities, civil, pavement, surface and groundwater construction remediation needs, with more than 32 years of national and international experience.

We have worked with City and county of Broomfield, and Wichita to name a few to review and train their staff.

As such we understand that many small municipalities may not have allocated budget or counsel of experienced professional engineer.

We like to volunteer our consulting services on remedial repairs of infrastructures as part of this flood event.

Please forward my contact information to your municipality clients.

Thanks

Behzad Mirzayi
